

Incanda Leather Furniture

Unique & creative masterpieces

We supply uniquely designed leather and gameskin furniture and accessories including sofas, wingback chairs, ottomans, leather beds and headboards, gameskin and leather floor rugs as well as skin and leather cushions.

Everything is manufactured in our own factory, enabling us to function as a boutique upholstery. We design and manufacture custom build products to satisfy the specific needs of our customers.

We only use solid wood and we still screw and glue our frames instead of using staple guns. But most important, we only use a top selection, natural, full grain leather to ensure the longevity of your couch.

Our business model is based on reasonable but not exorbitant profits, ensuring good value for money to all our clients.

After sales service is the backbone of building a strong brand.

At Incanda we strive to always exceed customer expectations to ensure that our "family" of customers only get bigger and bigger.
