

## Kitchen & Cupboard Studio

The original supplier of affordable kitchens & build-in cupboards

**The Kitchen & Cupboard Factory** is a leading manufacturer of affordable and quality kitchens and built-in cupboards in the Western Cape.

Since its inception in August 1996 the company has built a solid reputation based on good craftsmanship, dedicated customer service and a tailor-made approach to its wide customer-base.

**The Kitchen & Cupboard Factory** manufactures kitchens and built-in cupboards from an extensive range of materials such as melamine, solid wood and various other popular industry products. The company currently operates three showrooms in Somerset West, Paarl and Bellville and a factory at The Interchange in Somerset West.

Experienced sales teams at each of these centres offer free quotation and measurements where possible. This service is supplemented with computer-generated kitchen and space design, making the often-complex concept of kitchen design come alive for customers.

Deliveries and installations are done by dedicated and skilled installation teams. Customers do however have the option to arrange for own collection and installation.

**The Kitchen and Cupboard Factory** is owner-managed and commits itself to customer service, uncompromised quality products and service delivery.
